

# PLACE PREFERENCE SYSTEM

*A powerful and flexible system for measuring place preference and open field activity data*

*Place Preference 3-Compartment System with Photobeams*

*Place Preference 2-Compartment System with Photobeams*

## Features & Benefits

- » Photobeam array precisely records entries, time in, and exploratory pokes for each compartment
- » Can also be utilized as an activity system
- » Available in 3 compartment, 2 compartment or adjustable 2/3 compartment models.
- » Compartment floors are removable and can be used as templates to construct other floors
- » Manually operated doors rise fully
- » Non-heating LED lights eliminate inadvertent cues
- » Single database collects test data for exporting into Place Preference Reporter or statistical programs for further analysis

## PRODUCT OVERVIEW

SDI's Place Preference System is the most powerful, flexible and easy to use system for measuring place preference. SDI's Place Preference System employs a 4 x 16 photobeam array to precisely record entries into chamber, time in chamber, and exploratory pokes into chamber. In addition, the SDI Place Preference System accurately records and reports standard activity data such as ambulation movements, fine movements and time stamped (x,y) positions.

SDI's Place Preference System takes full advantage of the Windows® operating system with data organization and management software that combines power and flexibility with ease of use. The Place Preference System utilizes a database to store all study results in a single file (table) format ready for export. This eliminates the need to cut and paste multiple files together in order to export study results to statistical packages.

SDI's Place Preference test enclosure is designed with clear acrylic walls providing the ability to attach any type of cue. Removable floors allow the user to create custom floors from virtually any material to meet specific study requirements. High intensity LED ceiling lights are long lasting and emit no heat. Manually operated doors rise fully, providing an unobstructed pathway for the subject to cross between chambers.

## PLACE PREFERENCE COMPONENTS

- › Plexiglas, three-compartment station with 4 x 16 photobeam array, manual doors and LED lights
- › Removable, two-sided floors (rough and smooth texture)
- › Software
- › Control Box
- › User Manual
- › All cables and connectors

## PLACE PREFERENCE SPECIFICATIONS

Frame Dimensions	27 1/2" W X 8 3/4" D X 16" H 3 Compartment End Chamber (ID): 10 3/8" W X 8 1/8" D X 13 1/8" H Center Chamber (ID): 6 1/4" W x 8 1/8" D x 13 1/8" H 2 Compartment Each Chamber: 13 1/2" W x 8 1/8" D x 13 1/8" H
Weight	9 pounds
Composition	Acrylic
Maximum # Stations	16 per computer
Standard Cable Length	4Ft. Data Cable, 4Ft. Light Cable
Color	Clear

### SDI PLACE PREFERENCE SYSTEM REQUIREMENTS

Windows XP/Windows 7 compatible computer system with USB connection. Minimum disk and memory sizes specified to support Windows XP/Windows 7 are acceptable.

### SDI CONFIGURED COMPUTERS

SDI offers high performance Cobalt™ Configured Computers that are pre-installed with the Windows® operating system and applicable SDI software. If required, SDI will pre-install PC Interface cards and all relevant drivers. Each computer is fully tested with your system prior to shipment. When your SDI system arrives, all you have to do is unpack it, attach the cables and begin testing.
